Covid booster side effects were worse than the second shot for me. Bad headache, 101 temp, bad body aches. They were really bad for about 6-8 hours. I'm mostly better now but still have a slight temp and headache. Even with the side effects the vaccine is worth it. On a good note. My girls had no side effects from the second shot besides a sore arm.

After an hour and a half of screaming both girls have their first dose of the vaccine. Anna got it without any problems. Caitlin screamed and cried for an hour and a half. Then didn't she'd a tear when the pharmacist was able to do the shot. I'm beat....

Please do your part. I am terrified for my girls. Children haven't had the chance to get vaccinated yet. They are so vulnerable.

Found out this morning that Anna is still having tiny seizures that last less than 5 seconds even with upping her medicine. Waiting on her current levels to come back then we will see if we up meds again or add in another one. Not the news we wanted but she is still doing great.

Currently at the er with Anna. She had a seizure. She's doing good. They are running labs at the moment.

Update: We are home. Everything came back normal. Just monitoring her at home.

Covid update. The girls are back to normal. They never got fevers, just a little cough and some stuffiness. Andrew is doing good, had a cough but sounds better. I still feel like crap. I was feeling pretty good yesterday but today I woke up with a worse cough and back to being stuffy.

This is the hardest post I've ever had to make. This morning at 6am Anastasia passed away. Andrew came home and checked on her and she wasn't breathing. I did cpr until the ambulance came then we went to childrens. She was pronounced 15 min after getting there. We aren't sure what happened. We are in shock and devastated. As soon as we have any updates we will post them.

Philippines - 12 year old Alrence Qunitana living in Bohol Philippines had 1st Moderna vaccine on Feb.21, 2022, 4 months later he was diagnosed with an aggressive brain tumor and died on Jan.29, 2023 ([click here](#))

Argentina - 8 year old Yasmina Antonella Guevara developed a "vasculitis" after COVID-19 vaccine and died on Jan.11, 2023

😄 My little ones are excited. They actually are. Because it means they can get some candy afterward.

Only going to say this once. The covid vaccine saves lives. Go elsewhere to spread this ignorance.

CoffeeLife69 @RosenbloomPaula · 1/12/23

I am so very sorry for your loss. I can't imagine the pain. If your sweet boy was given the covid shots, please use his death to spare other families this pain by speaking the truth about how the are injuring and the lives they are taki...

Alberta, Canada - 7 year old boy Slade Smith had COVID-19 vaccines to play hockey, he died suddenly on Nov.29, 2022 after suffering "heart pain" ([click here](#))

It's with the heaviest of hearts we said good bye to our son on the morning of November 29,2022. He was 7 years old and just the light of our world.

His mom and dad , Dave and Cinder Smith, along with myself and Slades step dad Jeff (CFD member) are devastated. He was so loved and we will cherish every memory and moment we had with him up to the very last one.

Slade passed away suddenly after just a four day illness and his sweet little heart just couldn't take it. We miss him so much and we just ache with the pain of losing our child.

We may not respond right away to all your messages but be sure we are reading them all. They mean the world to us and cherish each one. Thank you for all your support in this tragic time.

The efforts made by the CFD members that showed up and the many EMS staff who did EVERYTHING they could to try and save our baby's life were nothing short of heroic.

Mourning the loss of Sweet Slade ❤️

Team fundraiser

Rachel Stallings and Marnie Burt are organizing this fundraiser on behalf of Tobi Smith.

Created 15 hours ago • [Emergencies](#)

Our EMS and CFD families have suffered an immense loss in which can never be mended. Mourning the loss of sweet, sweet Slade. A parent should NEVER have to bury their child - much less have to burden the cost of a funeral and life's many expenses through it all. While so many of us struggle with how to help such a lovely family in a time of such immense tragedy, this is just a small way that we can help. While the family would never ask for anything from anyone, as an Emergency Services Family, we want to at least try to help ease the financial burden for them while they take the much needed time they need to mourn the loss of this sweet boy.

Alberta, Canada, 13 year old boy hockey player Eric Homersham who was mandated COVID-19 vaccination to play hockey, died suddenly on Nov.9, 2022 by collapsing at school basketball tryouts ([click here](#))

'Eric was loved': Family, teammates mourn death of 13-year-old athlete

Eric Homersham, a Grade 8 student at West Island College, died Nov. 9 after collapsing at a school basketball tryout

A Calgary youth hockey club is honouring the life of a 13-year-old player who died unexpectedly last week.

Mexico, Oaxaca - 8 year old boy died five days after receiving Pfizer COVID-19 mRNA vaccine, on July 10, 2022 ([click here](#))

The family of eight-year-old boy reported the child died after receiving COVID vaccine on July 5, resulting in symptoms such as a fever, that got progressively worse. Due to his deteriorating health, an ambulance was called, which took him to a nearby hospital, where hours later, his death was announced.

Family members claim that the child died as a result of the vaccine and the symptoms he had suffered. The death was confirmed by the Secretary of Health of the state of Oaxaca, Virginia Sanchez, and reported that “there is already an investigation to find out the causes of the child’s death”.

Brazil - 5 year old girl Helena DeMarco Lavallo had 1st dose of Pfizer COVID-19 mRNA vaccine on Feb.18, 2022 and died 8 days later in her sleep

Helena de Marco Lavallo took the first dose of the Pfizer Vaccine on 2/18/2022, and 8 days later, she died in her sleep.

What a pain! What a nightmare! What a void! I miss you so much!
What a damn lab!
You who are a father or a mother don't deserve to lose a child. Goes against human nature. It only happens by the will of God.
Today we are going to live with a lot of difficulty, with a lot of pain, one day at a time.
Any person who has NOT LOST A CHILD, any person like that can't imagine the pain. It can't be!
When you meet a person who has lost a child, look closely into her eyes and you will see a point of sadness, a heart that will be eternally hurt, a chest that will always have an emptiness.
Nothing and no one will ever fill this void, heal this heart or completely complete this person of joy. There will always be a lack, a pain, an emptiness. Always.
Tomorrow will be 3 weeks since our little cutie named Helena leaves.
18.02, exactly one month ago Helena took her v@xxin@ from "F ÁIZZERR", on the 25th of the same month she slept PERFECTLY WELL and the next day, it didn't dawn.
Slept healthy, much loved, very cheerful, extremely happy, and didn't wake up.
This is a brief summary of history.
It hurts too much and we can't shut up. Inside us here, there is a storm of feelings, sometimes we are laughing at fools and we fall to the pit, like today... A horrible, sad, day only saved by our little Yasmin, because I believe without her me and my wife wouldn't have much to do here.

Think before you suffer the loss of a child. Think very carefully before taking your child to take this shit.
Don't miss the course of your life... don't lose your children.
I love you Helena! Keep an eye on us.
Thank you my love @virginalavalle and I'm sorry I didn't do more for our little one...
Everything I did was always with a lot of affection, care and a lot, but a lot of love. I tried to be the best father, the best friend and the best example for her. I tried to be that hero that stays forever in our childhood memories.
Today I don't even know who I am anymore.... ❤️ ❤️

Germany, Cuxhaven: A 12 year old girl died shortly after Pfizer COVID-19 mRNA vaccine in Oct.2021([click here](#))

The preliminary autopsy protocol suggested that the child's death had occurred as a result of the vaccination.

Due to this temporal connection, the district health department commissioned the body to be autopsied, which was then carried out in the Hamburg University Hospital.

“We are faced with a particularly tragic case here”, said the head of the health department, Kai Dehne.

Children reported to VAERS database, who died after Pfizer or Moderna COVID-19 Vaccines:

[VAERS ID: 2535782](#): 11 year old boy (non-US) had 3rd Pfizer dose on Dec.13, 2022, had a cardiac arrest 4 hours later and was found by family member with face immersed in bathtub, died the same day.

[VAERS ID: 2396993](#): 7 year old girl (non-US) had Pfizer 2nd dose on April 19, 2022 and died 3 months later on July 17, 2022

She presented 3 months after Pfizer jab on July 13, 2022 with fever, upper abdominal pain, rash, then had a seizure and died on July 17, 2022.

[VAERS ID: 2395618](#): 10 year old girl (non-US) had Pfizer jab, 8 days later presented with diarrhea, died on July 8, 2022.

[VAERS ID: 2373124](#): 5 year old girl (non-US) had Pfizer jab, next day developed nasopharyngitis, outcome was fatal, died on June 11, 2022 (one day after Pfizer jab)

[VAERS ID: 2410237](#): 5 year old girl (non-US) had 1st Pfizer Jab, died 4 months later on June 5, 2022.

In the months after Pfizer jab she developed acute ITP (immune thrombocytopenic purpura), was hospitalized with life threatening thrombocytopenia for 18 days, suffered

brain death and passed away.

[VAERS ID: 2316094](#): 6 year old girl (non-US) had Pfizer 2nd mRNA dose, 3 months later she developed abdominal pain, vomiting and died on May 28, 2022.

[VAERS ID: 2334700](#): 10 year old girl (non-US) had Pfizer mRNA jab, 24 days later she presented with fever and malaise and died on May 21, 2022.

[VAERS ID: 2193609](#): 8 year old girl (non-US) had Pfizer mRNA jab on Feb.18, 2022, and died on March 06, 2022, 16 days later.

She presented Mar.4, 2022 with fever and headache, on Mar.6, 2022 presented again with abdominal pain, vomited blood, had shortness of breath, was intubated, suffered cardiac arrest and died.

[VAERS ID: 2152560](#): 7 year old boy from Washington died 13 days after 1st Pfizer mRNA jab, on Feb.16, 2022

He had fever for 24 hours, became lethargic, vomited on the way to Emergency, was listless on presentation. He proceeded to a shock state and had a cardiac arrest. He was not able to be resuscitated and died in the ED.

[VAERS ID: 2109625](#): 8 year old previously healthy boy from Mississippi died 8 days after 2nd Pfizer mRNA dose on Feb.10, 2022

Mom called in 6 days after 2nd Pfizer jab complaining he had nausea and vomiting. Sometime during night of Feb.10, 2022, 8 days after his jab, his parents found him blue and lifeless in bed (cardiac arrest). Was taken to hospital, were able to get a pulse back several times, but lost him in the ICU.

[VAERS ID: 2377304](#): 9 year old girl from California had 1st Pfizer mRNA jab on Dec.12, 2021, presented with 2-3 days

of stomach ache, sore throat and chest pain, died 2 weeks after Pfizer jab on Dec.27, 2021

[VAERS ID: 1975356](#): 7 year old girl from Minnesota died in her sleep 11 days after her 1st Pfizer mRNA jab, on Dec.10, 2021 (she had fever, mild cough & congestion the night before, mom found her at 9:15am not breathing)

[VAERS ID: 1890705](#): 5 year old girl from Iowa with complex medical history died in her sleep 4 days after 1st Pfizer mRNA jab, on Nov.22, 2021

[TGA \(Australia\) ID: 724023](#) - 9 year old girl died after Pfizer mRNA jab of Cardiac arrest (March 25, 2022)

[TGA \(Australia\) ID: 719838](#) - 7 year old boy died after Pfizer mRNA jab (seizure, cardiac arrest) (Mar.11, 2022)

My Take...

Here are 25 children ages 5-12 who died after a Pfizer or Moderna COVID-19 mRNA vaccine. One child death from these products is one death too many.

There are 0 healthy children ages 5-12 who died from COVID-19 infection in USA or Canada.

These COVID-19 mRNA vaccines should NEVER have been rolled out in children ages 5-12 (or any age for that matter).

Every parent should have these cases in their legal files.
