Hospital & National Committees

Institutional Review Board at St. Luke's Hospital, 1989-1996

Research Committee at St. Luke's Hospital, 1995-2001

Pharmacy and Therapeutics Committee at St. Luke's Hospital , 1994-2001

Medical Informatics Committee, 1993-present

American Board of Obstetrics and Gynecology Examiner for Maternal Fetal Medicine Sub-Specialty Oral Board Exams, 2001-present
Society of Maternal Fetal Medicine Board of Directors, elected in February 2000 for the term 2000-2003
Society of Maternal Fetal Medicine Research Task Force ad-hoc Committee

CLINICAL FOCUSSES AND RESEARCH INTERESTS:

COVID-19 research, early treatment and local standards of care

COVID-19 vaccines, adverse affects

COVID-19 vaccines' impact on women or reproductive age, menstrual function, fertility, and impact on pregnancy outcomes

Isoimmunization, fetal blood sampling and fetal transfusion.

Fetal Therapy with over 1,000 fetal blood samplings / transfusions / therapies / stent placements. Have mentored 7 MFM physicians on using my technique of vascular access to the fetal circulation (via intrahepatic portion of umbilical vein) which I developed in the late 1980's and 1990's.

Cervical insufficiency. Have mentored 5 MFM physicians on my technique of transvaginal cervico-isthmic cerclage (TVCIC) which has been highly successful in our clinical experience in both settings of emergent, indicated and elective cerclage placement.

CMV infection in pregnancy

Antepartum prevention of intraventricular hemorrhage in the premature newborn.

Long term follow-up from obstetrical interventions, for example, developmental follow up of children exposed to phenobarbital in-utero, and multiple courses of antenatal/postnatal steroid.

Umbilical Cord Blood Gas Analysis

Intrapartum oxygen therapy and the management of fetal distress

Active Management of Labor

Analysis of characteristics of labor, dystocia and cesarean birth

The effect of epidural analgesia on the course of normal labor and delivery

Involved in early phases of the TRH/Betamethasone multicenter clinical trial

COVID-19 including pandemic, early outpatient therapy, adverse effects of vaccine, adverse effects of vaccine in pregnancy

BASIC RESEARCH:

Regulation of Fetal-placental blood flow in the following in-vitro models: Perfused Human Placental Cotyledon;

Isolated Placental Vessel Contractility Prostaglandin Production Rates in Placental Vessels

April, 1987: BRSG grant for "The effects of Leukotrienes in the perfused human Placental cotyledon"

1973-74: Department of Organic Chemistry Research Award, under the direction of Dr. George Trimitsis

1974-75: Department of Biology Research Award, under the direction of Dr. Guyla Fiscor

RESEARCH FUNDING:

St. Luke's Hospital Medical Staff Foundation Grant, 1998 (\$80,000) for "Seven year Developmental follow-up of children in the ICH Prevention trial" for completion of the follow-up (2001).

St. Luke's Hospital Medical Staff Foundation Grant, 1997 (\$15,000) for "Seven year Developmental follow-up of children in the ICH Prevention trial."

St. Luke's Hospital Medical Staff Foundation Grant, 1996 (\$15,000) for "Seven year Developmental follow-up of children in the ICH Prevention trial."

St. Luke's Hospital Medical Staff Foundation Grant, 1994 (\$15,000) for "Two year Developmental follow-up of children in the ICH Prevention trial."

Basic Science Research Grant from University of Texas Health Science Center, Houston (\$12,000) for basic science research in Fellowship training regarding perfused human placental model and incubation of placental tissue (Accepted, 1987).

Andrew Nicely Fund of St. Luke's Hospital Foundation (\$12,000) for perinatal research at St. Luke's Hospital (Accepted 1989)

McClvain Fund, (\$60,000)-Primary Investigator for "Randomized clinical trial of vitamin K and phenobarbital for prevention of intraventricular hemorrhage in the newborn (Accepted, 1990).
