

## Testimony of Dr. Marian Laderoute June 1, 2024

### Other recommendations that may be considered:

1. To write into the constitution the following:
  1. that no medical procedure or intervention shall be forced upon any individual under any circumstances especially vaccine mandates,
  2. that mRNA/cDNA gene therapy used for immunization purposes be permanently banned,
  3. that the position of president of PHAC be abolished and replaced with the Chief Medical Officer of Health who is not appointed by the Prime Minister,
  4. that companies must not pay for the review of their products by Health Canada to prevent conflicts of interest for reviewers, and
  5. xenotransplantation be banned in Canada
2. To effectuate legislation that:
  1. that no advertising of medical products, vaccines or devices be permitted at all in Canada,
  2. that new drugs cannot be exempt from the problem of fraud and adulteration,
  3. that no foreign entity approved drug would exempt the requirement for proper HC review,
  4. that the 30 day automatic approval for INDs (Investigational New Drugs or clinical trial applications) be rescinded, and more reviewers hired to meet the demand,
  5. that the lot release program for all biologicals marketed in Canada continues,
  6. that the Minister of Health or the Prime Minister would not have the power to forbid the use of off-label use of prescription drugs for certain indications,
  7. that Canadians have the right to the use and access to affordable natural health products unimpeded by legislation,
  8. that any indemnification against adverse events of vaccines or any other interventions be abolished including during EUAs,

9. that NACI be abolished along with the childhood vaccine schedule, and that all provinces ban the mandating of vaccines,
10. that all marketed products be required retrospectively (when applicable ie., the intervention is meant to reduce death) to pass the all-cause mortality test (with a period of grace to gather the evidence),
11. that all approved interventions be retrospectively tested by Health Canada for their effects on innate immunity such as statins and warnings provided in the product monographs, and in the future that new products being considered must meet these requirements,
12. that all Canadians be tested twice annually for their Vitamin D3 blood levels paid by the federal government,
13. that it is illegal for medical Colleges to silence speech by threatening to remove licenses of MDs or nurses,
14. that social media cannot censor opinions, and
15. that DHEA and analogues such as 7 keto-DHEA as well as genistein are made legally available in health food stores in Canada (ie., without prescriptions).
